Elements that was used

Element	Where	Why it is the right choice
<header>	Page top	Holds the site name and navigation. It is also reused inside each article for the headline and byline.
<nav>	In the header	It is the primary navigation, a block of links to the site's main areas.
<main>	Once only	It holds the page's central content, and a page may have only one.
<section>	Top Story, Latest News, Technology, Sports	Each is a themed group of related content with its own heading.
<article>	Each news story	Each story makes sense on its own, so it could be shared or syndicated separately.
<aside>	Most Read	It is related to the main content but not part of it. It is a sibling of <main>, so it is its own landmark.
<footer>	Page bottom	Holds contact details and copyright.
<address>	In the footer	The correct element for contact information.
